

TRANSELEVADORES

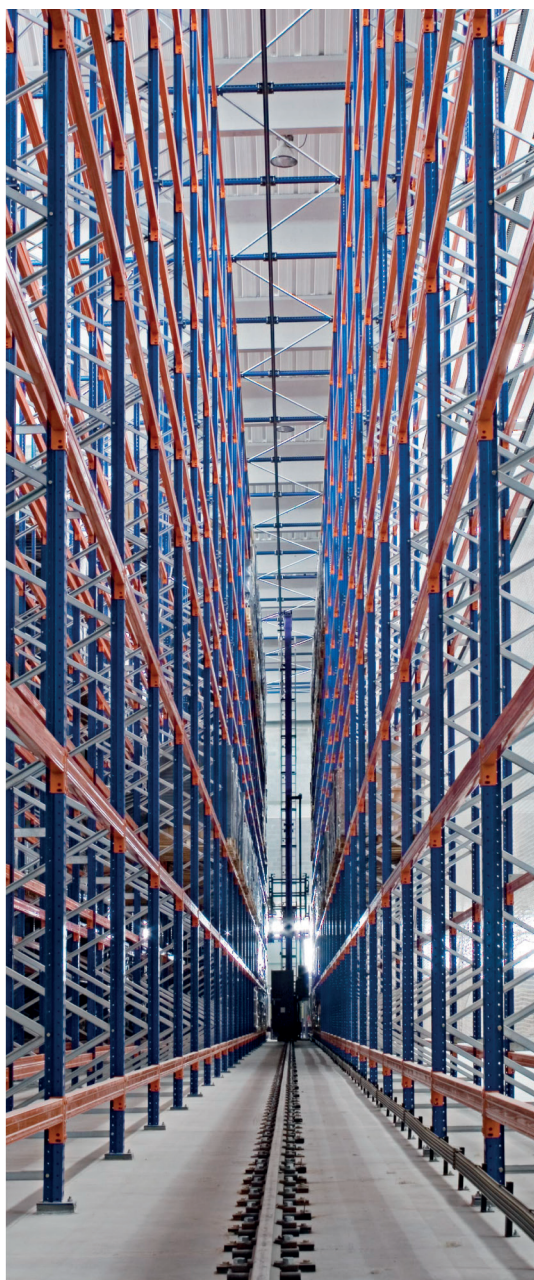

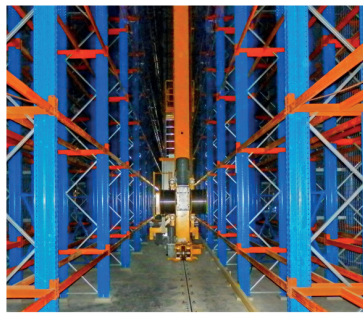

ALMACENES AUTOMÁTICOS
CON CALIDAD ATOX

- Almacenes de alto rendimiento
- Solución completamente automática
- Calidad y fiabilidad ATOX

CON UN SISTEMA DE TRANSELEVADORES ATOX SU ALMACÉN LOGRARÁ:

- Alto rendimiento, recogiendo y colocando mercancía de forma totalmente automática
- Optimización máxima del espacio, permitiendo el almacenamiento en altura
- Garantía de retorno de la inversión
- Seguridad, fiabilidad y combinación perfecta con las estanterías metálicas de alta calidad de ATOX Sistemas de Almacenaje.

ALMACENES DE ALTO RENDIMIENTO

SOLUCIÓN COMPLETAMENTE AUTOMÁTICA

CALIDAD Y FIABILIDAD ATOX

Soluciones completamente automáticas:

Los transelevadores permiten automatizar completamente un almacén, tanto con soluciones para palets como minoloads para cargas ligeras. Son, además, la combinación perfecta para los almacenes autoportantes de gran altura.

Los transelevadores circulan por los pasillos y son los que recogen y colocan la mercancía en la estantería.

Un software, adaptado a cada instalación, permite controlar las posiciones de los productos almacenados, optimizar los espacios y rentabilizar los movimientos.

STACKER CRANES

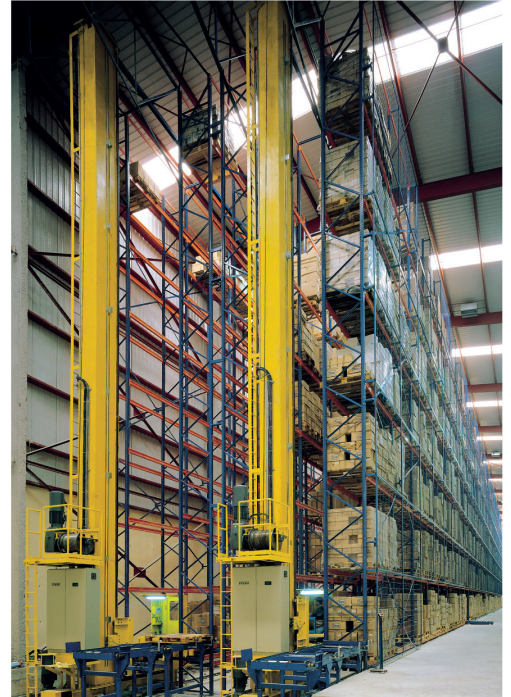

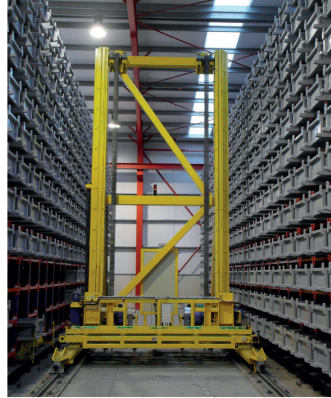

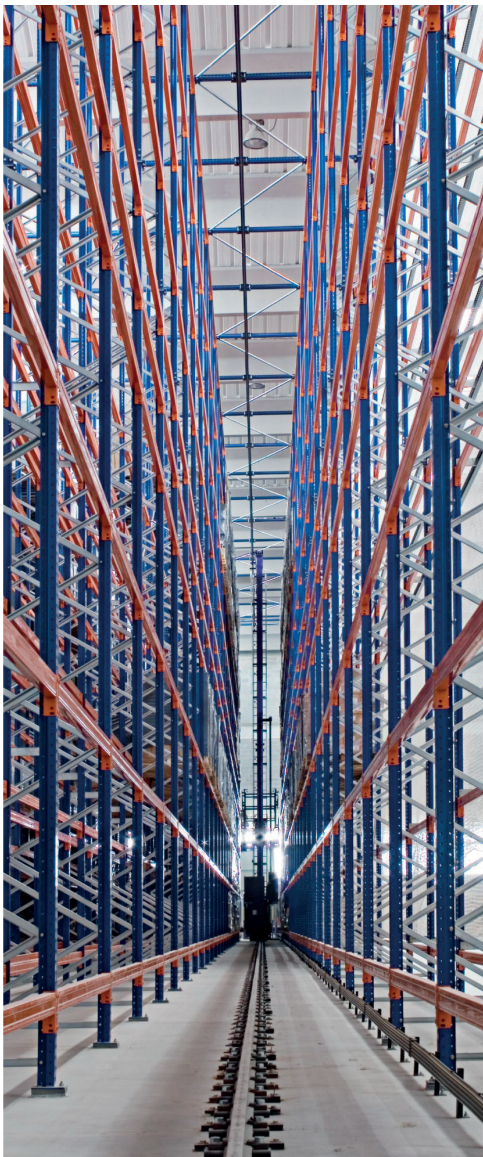

AUTOMATIC WAREHOUSES
WITH ATOX QUALITY

- High-performance warehouses
- Fully automatic solution
- ATOX quality and reliability

WITH A STACKER CRANE SYSTEM YOU WILL OBTAIN HIGH VALUE THROUGH THE FOLLOWING ADVANTAGES:

- High performance, collecting and placing goods fully automatically
- Maximum optimization of space, allowing storage at height
- Significant reduction of operating costs, which allows a guaranteed and fast return on Investment
- Safety and reliability are our main qualities, with the best quality and the high value products offered by ATOX.

HIGH-PERFORMANCE WAREHOUSES

FULLY AUTOMATIC SOLUTION

ATOX QUALITY AND RELIABILITY

Fully automatic solutions:

Stacker cranes allow a warehouse to be fully automated, both with solutions for pallet racking systems and miniloads systems for light loads. They are also the perfect combination for high-rise self-supporting warehouses.

The stacker cranes circulate through narrow and specifically designed aisles and they are the ones that collect, or place, the merchandise on the shelf or determined space and then bring it to an specific area, usually at the head of the racking system or warehouse, for its quick and reliable handling.

A software, designed and adapted to each installation, allows to control the positions of the stored products, optimizing the spaces and vastly improving the transportation of the merchandise, with less personnel, reducing costs and improving the profitability of the whole operation.
