

**Chrome Plated Spring Steel Lock Plate Designed
To Protect The Padlock From Tampering.**

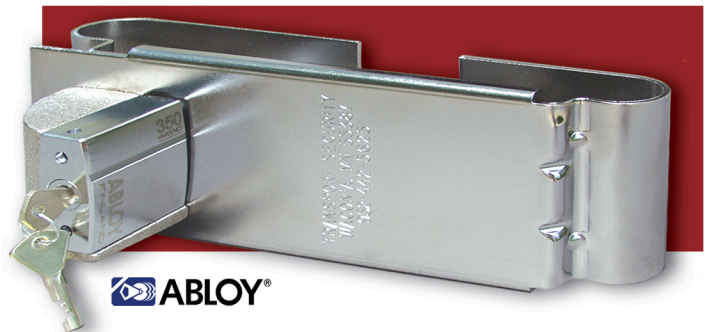

**Portable, Easy To Install High Security
Lock Adjusts To Fit All Trailers
And Containers.**

Made of 10 gauge chrome plated spring steel, 1/2" adjustable locking increments secure around the locking rods for a tight fit on all trailers and containers.

A cast steel block protects the ABLOY[®] padlock for maximum security from physical attack.

The padlock uses an internal tumbler system keyed to open using only one of 360 million combinations. Locks may be keyed alike, differently or to a master system .
